ARTIFACT

Problem Brief

STATUS

Working document

SECTION 01

Visible Failure

A test was pushed to MR-17. Unknown source.

SECTION 02

Verified Facts

No active tests assigned

The test (K-44) was retired

The source that pushed the test was internal

SECTION 03

Assumptions and Open Questions

Who owns the source "legacy_sync.exe"?

How did this test get pushed?

SECTION 04**System Environment Map****SECTION 04A****People and Roles**

Quality assurance staff,
Laboratory department,
Engineering.

SECTION 04B**Processes and Rules**

Synchronization test,
automated through internal
schedule.

SECTION 04C**Information and Data**

History logs

SECTION 04D**Technology and Tools**

The test was pushed by an
internal interface

SECTION 04E**Environment and Constraints**

The test cannot be stopped
by prompts. has to complete
before other task can be
started or ran.
QA cannot continue work.

SECTION 05

Investigation Boundary

Inside the Investigation

Source of legacy_sync

Outside for Now

What other departments may be affected. While other departments being affected could be a major issue, I'd argue finding the source of the problem is the highest priority.

SECTION 06

Organizational Impact

production will be paused which can cause slowdowns in workflows

SECTION 07

Problem Statement

Quality Assurance department cannot proceed with work and must remain at a halt until issue is resolved.

SECTION 08

Next Investigation Step

Checking history logs of events which was gathered by engineering that could answer where the executable came from and why it was pushed.
